Education

GL Bajaj Institute of Technology and Management, Greater Noida

Aug. 2017 – Jul. 2021

B.Tech in Electronics and Communication Engineering

85%

Technical Skills

Languages: Java, JavaScript, SQL

Automation Testing: Playwright, Selenium WebDriver, Cucumber, TestNG, Page Object Model (POM)

API Testing: Rest Assured, ReadyAPI, Postman

CI/CD & Version Control: Jenkins, GitHub Actions, Maven, Git

Tools: JIRA, Eclipse, VS Code, Zephyr, Testmo

Testing Expertise: Functional Testing, UI Testing, API Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, End-to-End Testing, Defect Management, Test Case Design

Experience

FCI-CCM

Nov. 2025 – Present

SDET II

Noida, India

- Developed and maintained a Playwright automation framework using JavaScript for the VARTA Communication Platform, improving test coverage and automation efficiency.
- Implemented AI-powered test automation using Playwright MCP Servers and Test Agents to accelerate test execution and validation.
- Integrated automation with GitHub Actions and CI/CD pipelines to execute Functional, UI, Regression, and End-to-End tests, ensuring high-quality releases and efficient defect resolution.

Samsung R&D Institute India

Oct. 2021 – Oct. 2025

Test Automation Engineer

Noida, India

Project: Samsung Account

Feb. 2023 – Oct. 2025

- Developed and maintained a scalable Playwright automation framework using JavaScript, Page Object Model (POM), built-in reporting, assertions, and annotations.
- Automated end-to-end, regression, smoke, sanity, and integration testing, reducing manual testing effort by 30–40%.
- Implemented API Automation using Rest Assured, TestNG, Maven, POJO, and Jackson for backend service validation.
- Integrated automation suites with GitHub Actions CI/CD Pipelines, enabling faster feedback cycles and early defect detection.
- Participated in all phases of the SDLC and STLC, including requirement analysis, test planning, test execution, defect management, and release validation.
- Utilized JIRA, Git, and Agile/Scrum methodologies for defect tracking and successful project delivery.

Project: Samsung Knox

Oct. 2021 – Feb. 2023

- Designed and executed frontend automation test suites using Java, Selenium WebDriver, and TestNG for Samsung Knox applications, improving test coverage and application quality.
- Integrated automation execution with Jenkins CI/CD Pipelines, enabling automated execution on code commits and scheduled runs.
- Performed API testing using ReadyAPI and validated backend service functionality across multiple environments.
- Conducted Performance Testing and Benchmarking using Apache JMeter to evaluate application scalability, reliability, and response times under varying workloads.
- Managed automation test suite maintenance, analyzed execution results, reported defects, and collaborated with development teams for resolution.
- Performed functional testing, black-box testing, UI validation, defect tracking, and QA reporting to ensure product quality.

Awards & Recognition

Samsung R&D Institute India

Q4 2024

Employee of the Quarter

Noida, India

- Awarded Employee of the Quarter (Q4 2024) for exceptional contributions to test automation, quality engineering, and product quality improvements.
